

- Very high yields
- Resistant to stripe rust, stem and leaf rust
- Ideal for early winter sowings
- Short straw with excellent standing power

AMAROK is a winter wheat, well suited to the longer growing season areas in Victoria and South Australia. GrainSearch shareholders first sowed **AMAROK** in 2004 on over 5000 Acres; in 2005 the area sown increased to 10,000 Acres. From over ten different sites and from five years of trials in Victoria, **AMAROK** has produced 8% higher yields than Mackellar and 18% higher yields than Kellalac.

Average of GrainSearch Wheat Trials 2000 - 2005
